For partner communities

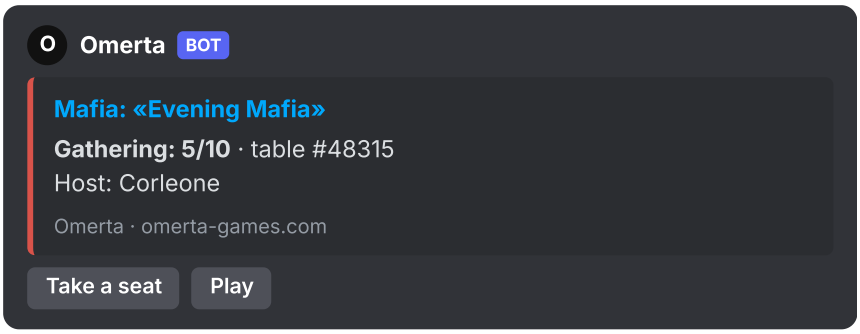

How to connect Omerta to your Discord

Omerta is games with video and voice right in the browser. Connect one channel of your server, and tables that are gathering, tournaments, news, a weekly rating and, if you want, an invitation to Love Nest dating (18+) will arrive there on their own. Your members take a seat in one click.

What appears in your channel

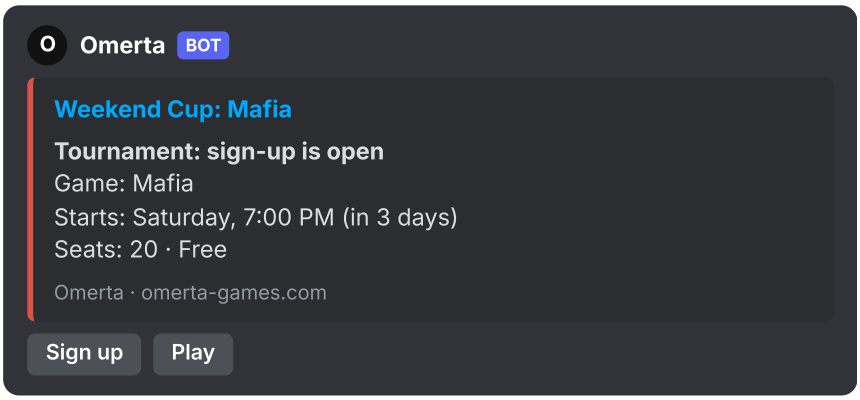

Tables that are gathering

The game, seats taken, «Take a seat» and «Play» buttons. While the table gathers, the counter updates; once the game starts the post is marked «you can watch»; if the table falls apart, the post is deleted.

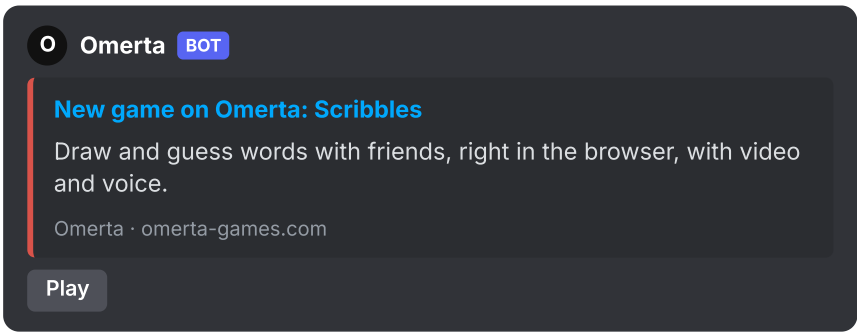

Tournaments and scheduled games

Name, game, date and time (everyone sees them in their own time zone), number of seats, «Sign up» and «Play» buttons.

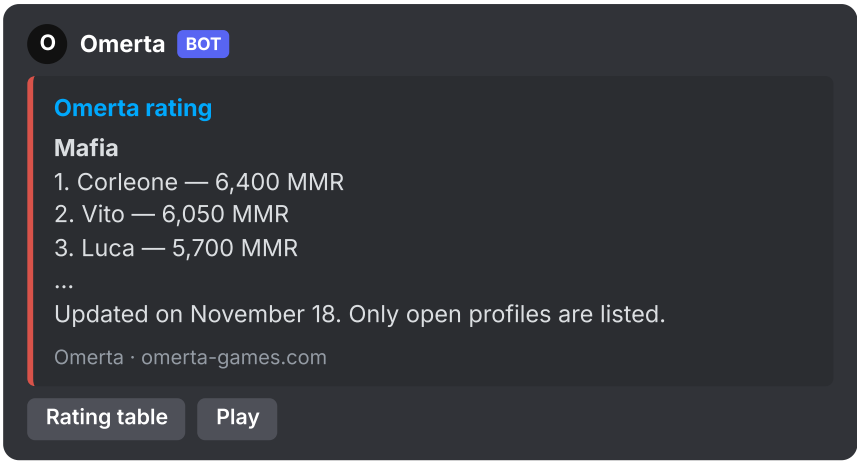

Omerta news

New games and important changes. The team sends news by hand and rarely.

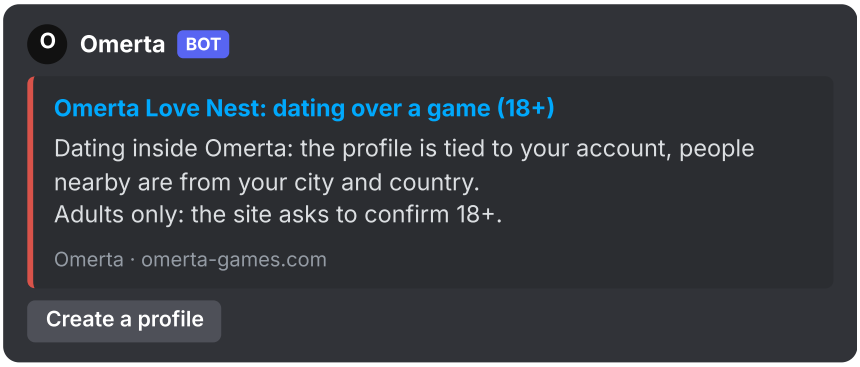

Omerta rating, weekly

One message: the top 10 open profiles in your channel's games. Once a week Omerta edits it in place and does not send a new one. The date shows in the reader's time zone.

Omerta Love Nest (18+), optional

One invitation with a «Create a profile» button. It is posted once and deleted when you turn the feed off. It contains no one's profiles, photos or names.

How often

- Announcements arrive at a calm pace, so the channel never turns into spam. A table appears once a group has gathered at it.
- **Not posted:** tables with a password, closed and reserved tables, test tables and AI player tables. Only tables anyone can join.
- A tournament or scheduled game: one post when it is announced. News: rarely, by hand.
- Rating: one message, edited in place once a week. Love Nest: one message for as long as the feed is on.

Option 1. One button on the site (recommended)

It is done by a member with the Manage Webhooks permission on the server (usually the owner or an admin). Takes a minute, nothing to send us.

1. **Sign in at omerta-games.com**
   The channel is tied to your account, and you manage it yourself.
2. **Site menu → Partnership → Omerta announcements in your Discord**
   omerta-games.com/?section=partners
3. **Choose what to receive**
   Tables, Tournaments, News, Rating, Love Nest (18+), and the games you need (none ticked means all). The community name is optional: leave it empty and we take the server name.
4. **Press «Connect to Discord»**
   Discord opens its own window: choose the server and channel and press «Authorize». Discord creates the Omerta webhook in that channel itself.
5. **Done**
   You return to the site with «Channel connected». The rating and the Love Nest invitation appear shortly.

> Manage the channel in the same place, under My Discord channels: Pause / Resume, Edit, Refresh rating now and Disconnect (the webhook created by the button is deleted from your server). A regular account can connect up to 2 servers.

If all places are taken

The number of channels in the network is limited. If there are no free places, the channel is saved as a request marked «Waiting for a place» and turns on when a place frees up. You do not need to do anything.

Option 2. A ready webhook

For Discord partners: the status is granted by the Omerta team. With it you can paste a webhook address in your cabinet on the Partnership page yourself: Omerta checks it with a request to Discord without posting to the channel. Without the status, send the address to the Omerta team privately.

1. **Channel settings → Integrations → Webhooks**
   Hover over the channel you need (for example, #play) and click the gear.
2. **New Webhook**
   Name it «Omerta» and check that the right channel is selected in the Channel field. The avatar is optional: messages always come with the Omerta logo.
3. **Copy Webhook URL**
   The address looks like this: https://discord.com/api/webhooks/1234.../AbCd...
4. **Paste the address in your cabinet**
   Partnership → Discord partner cabinet → Paste a webhook. Tick feeds and games as in option 1.

> Send the address only privately and never post it in an open channel. Anyone who knows it can write to your channel on behalf of the webhook.

What you choose

	How it works
Feeds	Tables · Tournaments and scheduled games · News · Rating · Love Nest (18+). All of them or some; Love Nest is off by default.
Games	A filter for tables and the rating. The rating uses the first three games of the filter that have a table; without a filter, Mafia. All tournaments and news still arrive.
Change later	At any time: Partnership → My Discord channels → Edit. Changes apply at once.

Discord partner cabinet

Up to 10 servers, pasting a webhook, a test message and stats: link visits, sign-ups, who played, who came back after a week, how many created a Love Nest profile. Numbers only: we never show who exactly came. Plus a personal invite link for any platform.

The rating in the channel, in detail

— The table is the global Omerta table with the same places as on the site. Omerta does not know who is on your server, so it does not build a «top of your server».

— Only **open profiles**: nickname and MMR. Private profiles and the AI player never go to Discord. A player can make the profile private at any time and will be gone from the post at the next update.

— There is one message. If it is deleted in Discord, Omerta posts a new one next week. If you turn the feed off, Omerta deletes its message itself.

Love Nest in the channel, in detail

— The «Create a profile» button opens the Love Nest section on omerta-games.com. You can sign in with Discord: the nickname and avatar are filled in and you can change them.

— Before the profile, the site asks to confirm 18+. The profile is visible only inside Love Nest on the site; we never post it to Discord.

— Want the invitation in a separate channel? Connect that channel with only the Love Nest feed.

— Without a channel post: the **/profile** command replies with the same invitation, visible only to whoever ran it. Alongside: **/play** and **/docs** (a menu of Omerta PDFs). Add the commands: discord.com/oauth2/authorize?client_id=1564627159807565928&scope=applications.commands, no bot and no permissions.

How to know it works

When you connect with the button, the result shows on the site right away. A Discord partner can send a test message from the cabinet. If Discord rejects a message three times in a row (for example, the webhook was deleted), the channel turns off on our side by itself, and you see it under My Discord channels.

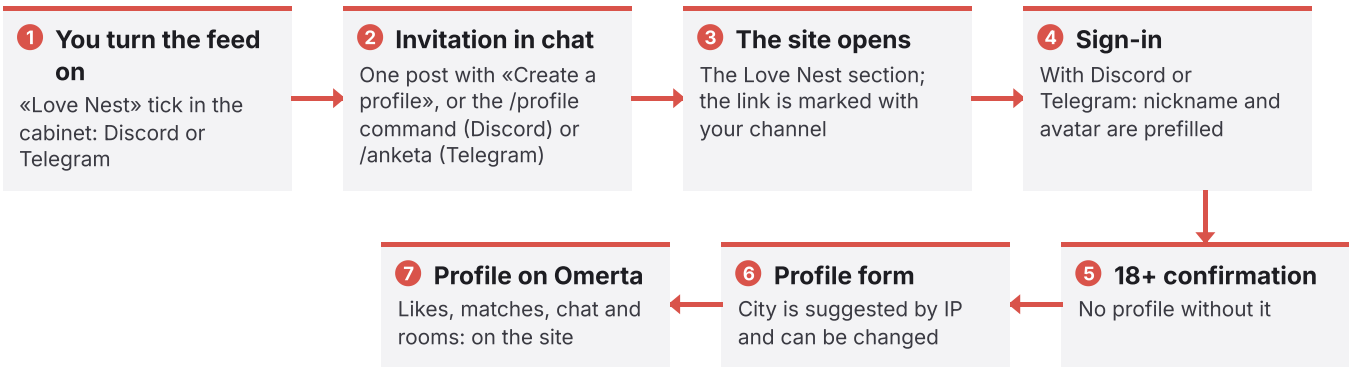

If something goes wrong

Situation	What to do
Discord does not show the server	You need the Manage Webhooks permission. Ask the server owner to connect the channel or to give you this permission.
Nothing arrives	Tables are posted only while an open table is gathering — not instantly. Check that the Omerta webhook was not deleted.
No rating	Check that the Rating feed is on; the first post comes shortly. You can press «Refresh rating now».
The webhook was deleted	Press «Disconnect» and connect the channel with the button again.

Love Nest (18+)

Love Nest dating through your channel

Omerta Love Nest is dating for adults (18+), tied to the Omerta profile: people meet through games, by city and country and shared favorite games; after a mutual like they get a chat, a room for two and a game together. A partner only invites: the section itself, profiles, likes and chat live on the Omerta site.

The person's path, step by step

1. **You turn the invitation on**
   In the partner cabinet tick «Love Nest (18+)» for a Discord channel or a Telegram chat. The feed is off by default.
2. **Members see one invitation**
   Omerta posts one message, «Omerta Love Nest, dating over a game (18+)», with a «Create a profile» button. Or a person types /profile in Discord or /anketa in Telegram. The answer is visible only to them (in a Telegram group it is a reply to the command and disappears after a minute).
3. **The site opens straight in Love Nest**
   The link is marked with your channel: that is how visits and profiles are counted.
4. **Sign-in with Discord or Telegram**
   The nickname and avatar are prefilled from the account and can be changed. No separate sign-up.
5. **18+ confirmation**
   Before the profile the site asks to confirm the person is 18. Discord and Telegram do not report age, so it is confirmed on the site.
6. **The profile**
   The city is suggested by IP and can be changed by hand; coordinates are not stored, only the city.
7. **The profile appears in Love Nest**
   Like any other: people nearby by city and country see it. Dating rooms are in the main lobby; likes, matches and chat are on the site.

What is never posted and what the partner sees

Never goes to Discord or Telegram	What the partner sees
Profiles, photos, names and nicknames, who liked whom, chats and matches. The channel gets only an invitation with a link to the site.	Numbers only: visits through the channel's links, sign-ups, how many play, how many created a Love Nest profile and (in Discord) how many times the command was used per day. Who exactly is not visible.

Rules for partners

— **18+ only.** Turn Love Nest on where members are adults. The site still asks to confirm age before a profile.

— **No pings.** The bot mentions no one and sends no private messages.

— **One invitation per channel.** Omerta posts one message and sends no repeats; in a Telegram group /anketa works at most once per 15 seconds per chat.

— **You can turn it off any time.** Remove the tick and the post is deleted; there are Pause and Disconnect.

— **Moderation is on the site.** Reports, blocking and profile review are handled by the Omerta team. Blocking hides people from each other; a report goes to moderators.

How to turn it on

	Steps
Discord	1. Site menu → Partnership → Omerta announcements in your Discord. 2. Tick «Love Nest (18+)», press «Connect to Discord», pick a server and channel. The invitation appears within 10 minutes. 3. The /profile, /play and /docs commands are optional, no bot or permissions: https://discord.com/oauth2/authorize?client_id=1564627159807565928&scope=applications.commands
Telegram	1. Site menu → Partnership → Omerta in your Telegram. 2. Tick «Love Nest (18+)», press «Add to group» (you are an administrator of the group) or «Add to channel» (the bot is an administrator, post the code). 3. The bot says the chat is connected; the invitation appears shortly. The /anketa command works in a group right away.

What Omerta receives from your server

In short: an address Omerta uses to send messages to one channel you chose. We have no access to the server itself, its members or messages.

What we receive

— **Connecting with the button.** Discord creates the «Omerta» webhook in the chosen channel and gives us its address, the server and channel IDs and sometimes the server name. We do not keep Discord's temporary key.

— **Connecting by hand.** Only the webhook address; from it we learn the server and channel IDs.

— **Your choices.** Feeds, games and community name, and the Omerta account that connected the channel.

What we do not receive and cannot do

We do not see messages, the member list, roles, other channels or server settings. Your Discord account (email, servers, friends) is not shared with us. Omerta has no bot on your server: we cannot kick, ban, give roles or change anything. Love Nest profiles, photos and names are never posted to Discord.

What Omerta does with the webhook

— Sends its own messages: tables, tournaments, news, the rating, the Love Nest invitation, a check message and the Play panel.

— Edits its own messages: the table seat counter, «you can watch», the weekly rating.

— Deletes its own messages: a table that fell apart; the rating and the invitation when you turn the feed off or disconnect the channel.

— Mentions no one: no @everyone, @here, roles or members.

— If you connected with the button and pressed «Disconnect», Omerta deletes the webhook from your server.

What we count and where we store it

— Links in messages are marked with your channel: we see only numbers: how many came, signed up, play and created a Love Nest profile.

— The webhook address is kept secret on the Omerta server: the team panel shows only its beginning, logs show only the number.

— Once a channel is disconnected, its record and address are removed from our list.

> Questions about data and access: Telegram @teassss (Lachesis, Admin), @MFAlice (Maneky, Admin) or the bot @Omerta_games_bot.
