Omerta × your Discord server

Your people. Our tables. One big game.

Over 20 games with video and voice right in the browser, ratings, tournaments, clans and Love Nest dating. Connect a channel of your server with one button, and tables, tournaments, a weekly rating and news will arrive there on their own. Free.

omerta-games.com

Why it matters

A server is alive when people play in it

Discord is great at bringing people together, but there is nothing in it to play with 10 people on camera. Omerta has it: open a link, take a seat, play. Nothing to install, on a computer or a phone. Your server gets a steady reason to gather, and your members get opponents and friends from other communities and countries.

What your server gets

Everything below already works

Tables that are gathering

An open table is filling up, and a message with a «Take a seat» button arrives in the channel. Seats update live; if the table falls apart, the post is deleted.

Tournaments and scheduled games

An announcement with the date and time, shown to everyone in their own time zone, and a «Sign up» button.

Weekly Omerta rating

One message with the top 10 in your channel's games. Omerta edits it in place instead of sending a new one; you can also refresh it by hand.

New

Love Nest (18+), optional

One invitation to Omerta dating with a «Create a profile» button. Only a link: no one's profiles or photos go to Discord.

New

The «Play» button

In every message: the site seats a person at a table that is gathering, or opens a new one.

Your stats

Links are marked with your channel: you see how many people came, how many play and how many created a Love Nest profile. Numbers only.

> Everything is free: servers, video, voice, announcements and tournaments are paid for by Omerta. All you bring is a channel and a wish to play.

The Omerta ecosystem

One account, everything inside

A person comes from your channel once and gets an Omerta account: with it they play, climb the rating, join a clan, sign up for tournaments and meet people in Love Nest.

Over 20 games

Mafia (classic for 10 and City Mafia for 5–12), Shelter, Spy, Hidden Code, Guess the Word, Chess, Checkers, Backgammon, Durak, Dominoes, Scribbles, Quiz Night and more. Plus the Room for meetups and watching together.

Rating and leagues

A separate MMR in every game, from 1,000 to 10,000, leagues from Bronze to Legend, match history and a place in the global table.

Tournaments with judges

Tournaments in every game: a judge at the table and a results table. A tournament named after your community is possible by agreement.

Clans

Turn your server into a clan: a shared chat, a tag next to nicknames, the weekly clan table and clan-vs-clan tournaments.

Omerta Love Nest (18+)

Dating inside Omerta, tied to the profile: people nearby by city and country, shared games, chat after a mutual like, a room for two and a game together.

Premium and coins

Only looks and convenience. Everything you need to play is free. No bets, no playing for money, coins cannot be withdrawn.

Advantages

What your server gains

- **Activity without extra moderator work.** Announcements arrive on their own, the rating updates on its own, and the channel stays alive even when moderators are busy.
- **New people.** Your members play with people from other servers and countries, while your server stays yours: the conversation happens with you.
- **A reason to compete.** The weekly rating in the channel shows the best Omerta players, so there is someone to look up to and chase.
- **Transparency.** Your cabinet shows how many people came from you. Omerta does not take your members away and does not write to them in direct messages.
- **Nothing to install.** No bot and no server permissions: one webhook in one channel that you pick yourself.

How it works

What Omerta does in your channel

— **Posts** its own messages: tables, tournaments and scheduled games, news, the weekly rating, the Love Nest invitation (if you turned it on), a check message.

— **Edits its own messages in place:** the table seat counter, the «you can watch» mark, the rating table once a week.

— **Deletes its own messages:** the post of a table that fell apart before the start; the rating and the Love Nest invitation when you turn those feeds off or disconnect the channel.

— **Mentions no one:** no @everyone, @here, roles or members.

— **No spam.** Announcements arrive at a calm pace, so the channel never turns into a mailing feed.

Data

What Omerta receives and stores

— The minimum the channel needs: its address and IDs, sometimes the server name. The address is kept secret and is never shown in full.

— Your choices: feeds, games, community name, and the Omerta account that connected the channel: only that account manages it.

— Numbers for your channel's links: visits, sign-ups, who plays, how many created a Love Nest profile. No nicknames, emails or Discord data of those people.

What Omerta never does

Limits

— It does not read messages, see members, roles or other channels, or change server settings: Omerta has no bot on your server.

— It never posts anyone's Love Nest profiles, photos or names to Discord, only an invitation with a link to the site.

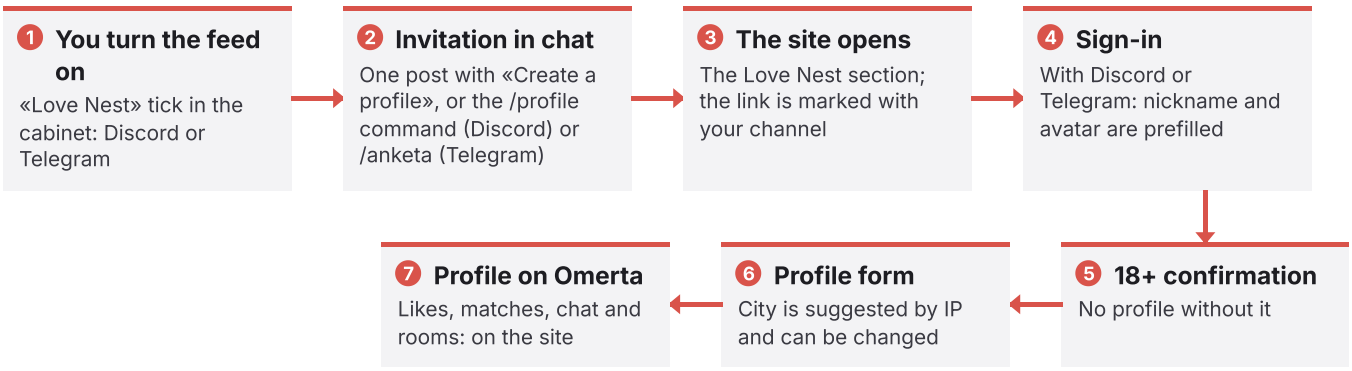

— Only open profiles make it into the rating: the nickname and MMR already visible in the table on the site. A private profile never goes to Discord.

— Omerta does not know who is on your server: signing in with Discord gives us only the person's own id and name. That is why the rating in the channel is the global Omerta table.

Love Nest (18+)

Love Nest dating through your channel

Omerta Love Nest is dating for adults (18+), tied to the Omerta profile: people meet through games, by city and country and shared favorite games; after a mutual like they get a chat, a room for two and a game together. A partner only invites: the section itself, profiles, likes and chat live on the Omerta site.

The person's path, step by step

1. **You turn the invitation on**
   In the partner cabinet tick «Love Nest (18+)» for a Discord channel or a Telegram chat. The feed is off by default.
2. **Members see one invitation**
   Omerta posts one message, «Omerta Love Nest, dating over a game (18+)», with a «Create a profile» button. Or a person types /profile in Discord or /anketa in Telegram. The answer is visible only to them (in a Telegram group it is a reply to the command and disappears after a minute).
3. **The site opens straight in Love Nest**
   The link is marked with your channel: that is how visits and profiles are counted.
4. **Sign-in with Discord or Telegram**
   The nickname and avatar are prefilled from the account and can be changed. No separate sign-up.
5. **18+ confirmation**
   Before the profile the site asks to confirm the person is 18. Discord and Telegram do not report age, so it is confirmed on the site.
6. **The profile**
   The city is suggested by IP and can be changed by hand; coordinates are not stored, only the city.
7. **The profile appears in Love Nest**
   Like any other: people nearby by city and country see it. Dating rooms are in the main lobby; likes, matches and chat are on the site.

What is never posted and what the partner sees

Never goes to Discord or Telegram	What the partner sees
Profiles, photos, names and nicknames, who liked whom, chats and matches. The channel gets only an invitation with a link to the site.	Numbers only: visits through the channel's links, sign-ups, how many play, how many created a Love Nest profile and (in Discord) how many times the command was used per day. Who exactly is not visible.

Rules for partners

— **18+ only.** Turn Love Nest on where members are adults. The site still asks to confirm age before a profile.

— **No pings.** The bot mentions no one and sends no private messages.

— **One invitation per channel.** Omerta posts one message and sends no repeats; in a Telegram group /anketa works at most once per 15 seconds per chat.

— **You can turn it off any time.** Remove the tick and the post is deleted; there are Pause and Disconnect.

— **Moderation is on the site.** Reports, blocking and profile review are handled by the Omerta team. Blocking hides people from each other; a report goes to moderators.

How to turn it on

	Steps
Discord	1. Site menu → Partnership → Omerta announcements in your Discord. 2. Tick «Love Nest (18+)», press «Connect to Discord», pick a server and channel. The invitation appears within 10 minutes. 3. The /profile, /play and /docs commands are optional, no bot or permissions: https://discord.com/oauth2/authorize?client_id=1564627159807565928&scope=applications.commands
Telegram	1. Site menu → Partnership → Omerta in your Telegram. 2. Tick «Love Nest (18+)», press «Add to group» (you are an administrator of the group) or «Add to channel» (the bot is an administrator, post the code). 3. The bot says the chat is connected; the invitation appears shortly. The /anketa command works in a group right away.

Connecting

How to connect in 2 minutes

1. **Sign in at omerta-games.com**
   The channel is tied to your Omerta account, and you manage it yourself.
2. **Site menu → Partnership → Omerta announcements in your Discord**
   Tick the feeds: tables, tournaments, news, rating and, if you like, Love Nest (18+). Pick games, or keep all of them.
3. **Press «Connect to Discord»**
   Discord shows its own window: choose the server and channel and press «Authorize». You need the Manage Webhooks permission.
4. **Done**
   You return to the site with «Channel connected». The first rating and the Love Nest invitation appear shortly.

> By hand: with the Discord partner status (granted by the Omerta team) you can paste a ready webhook in your cabinet, and Omerta checks it without posting to the channel. Details are in the PDF «How to connect Omerta announcements to Discord».

Settings

Feeds, games, rating, Love Nest

- Partnership → My Discord channels → Edit: feeds, games and name change at once.
- The rating follows the games of your filter; without a filter, Mafia. You can refresh it manually.
- Love Nest is off by default. Want a separate dating channel? Connect a second channel with only this feed.
- You can connect several servers; Discord partner status (by agreement) adds a cabinet with stats and a personal invite link.
- **The /profile, /play and /docs commands** (/docs is the menu of Omerta PDFs in your language) are optional, with no bot and no permissions: discord.com/oauth2/authorize?client_id=1564627159807565928&scope=applications.commands. Only the caller sees the reply; Omerta stores just the number of /profile uses.

Disconnecting

Turn it off at any time

- «Pause»: messages stop arriving, our rating and Love Nest invitation are removed from the channel.
- «Disconnect»: Omerta deletes its rating and invitation, and the webhook created by the button is deleted from your server.
- Or simply delete the Omerta webhook in Discord: Channel settings → Integrations → Webhooks.

Contacts

Let's play together

Application: site menu → Partnership (omerta-games.com/?section=partners). Telegram: @teassss (Lachesis, Admin), @MFAlice (Maneky, Admin), bot @Omerta_games_bot.

Roles, Premium and coins for your community are not given out automatically: terms are agreed with the Omerta team separately.
